SERVICES

CARGO HANDLING

From: supplier - Ports - Warehouse

Our cargo collection service from the supplier to the ports and warehouses is a comprehensive solution for the safe and efficient transportation of goods.

TRANSPORTATION

Maritime - Air - Land

We have a ground transportation system that allows us to pick up your goods from your suppliers' or manufacturers' warehouses in Latin America at very competitive costs. We offer a transportation network that provides service to any seaport, airport, or train station.

CUSTOMS CLEARANCE

Customs Declaration - Document Verification - Goods Receipt

We have extensive knowledge and a network of contacts in the main seaports and countries of Latin America and the rest of the world. We specialize in offering real solutions to our clients' major logistical problems. We can handle even the most challenging projects.

STORAGE

Dry - Refrigerated - Frozen

We have a great capacity to store and accommodate the volume of shipments that adjust to the specifications, requirements and flows of the supply chains of each client.

CARGO DISTRIBUTION AND CONSOLIDATION

Cargo Consolidation - Distribution to Suppliers or Branches

We work with logistics centers to facilitate storage, labeling, and consolidation of cargo for companies in commercial and industrial free zones to supply the local and international markets.

SOFTWARE TECHNOLOGY

Control - Visualization - Tracking - Interaction with Operations via the Web

We have the software technology that allows our clients to control loads of any supplier and filter anything in a single point, allowing them to view and interact with their operations just by accessing our website.

DOMINICAN REPUBLIC LOGISTICS HUB

NEW REALITY NEW BUSINESSES NEW OPORTUNITIES

The Dominican Republic has emerged as a leading logistics hub in the region, capitalizing on its strategic location and robust infrastructure. Efforts to increase efficiency, such as the implementation of a 24-hour dispatch system for goods at ports, have contributed to its goal of becoming a regional logistics center. This initiative has spurred job creation, diversified industries beyond tourism, and boosted sectors like free trade zones and remittances. The country's customs department has played a crucial role by implementing a new regulatory framework, advanced technologies for non-intrusive inspections, and integrating new technological systems.

As a result, the Dominican Republic has become a key player in the Caribbean and Latin America, with strong supply chains, thriving free zones, local industries, and a growing domestic market. Companies are increasingly focusing on improving their logistics and inventory management near their target markets through the concept of nearshoring. The country's capacity to handle larger volumes of air, sea, and land cargo has made it highly competitive, with air transportation often proving more cost-effective and efficient than domestic distribution within the United States. The efficiency of the logistics sector is underscored by the potential for a 30% increase in exports with a mere 10% reduction in transportation costs.

Moreover, the Dominican Republic boasts excellent multimodal connections throughout Latin America, connecting various logistics nodes in the region. A Logistics Hub Segment Study is currently underway, examining the country's Hub Segment Conditions and identifying potential target markets. This commitment to continual improvement has resulted in the country achieving its highest volume of goods in transit in 2022, solidifying its position as a vital transit connection hub.
